

# Importing Returns – Louisiana Import File Structure

---

Importing your return is an alternative to manually selecting returns and entering data. Use the instructions below to create a comma-separated (\*.csv or \*.txt) import file using the program of your choice (Excel, Notepad, etc). The file can contain multiple returns, business locations, tax authorities, and filing periods.

After the import file has been created you can upload it to check for errors and then import the return data using the step-by-step instructions below. After importing, you will have the opportunity to review the return before filing it to completion.

The import file has two parts: the Header line and the Return Data lines. The import file must meet the following specifications:

## The Header Line

**The Header line should consist of the following information:** Short Name of Authority, File Period, Import ID

The example Header line below indicates an Acadia Parish tax return, for the February 2013 filing period, and business location with Import ID 88889.

**Example Header line:**  
ACADIA,02/2013,88889

**Short Name of Authority:** Enter the short name of the tax authority that administers the return that is being imported. The Short Name for each tax authority is listed in a table on the next page.

**File Period:** Enter the monthly period in which tax was collected by the seller. Format this field as MM/YYYY.

**Import ID:** Enter the internal number assigned to a business location. To find the Import ID for a business location, place your cursor over **Account Center** on the menu bar and then select **My Account**. The Import ID is listed in the left-hand column of each location's row.

Business Locations						
ADD A NEW LOCATION						
Import ID	Name	Address	City	State	Zip	Action
88888	Test Location #1	123 Florida Blvd	Baton Rouge	LA	70806	EDIT
88889	Test Location #2	456 Florida Blvd	Baton Rouge	LA	70806	EDIT

## The Return Data Lines

Use the line labels printed on the **Return Import Templates** to determine which line labels to use and where to enter amounts.

### To access the return import templates:

1. Place your cursor over **Create Return** on the menu bar.
2. Select **Import a Return** from the drop-down menu.
3. In the Louisiana section, select a **Return** and **Filing Period** from the drop-down menus. Then, click the **View as PDF** button.
4. Use the line labels printed on the **Return Import Template** for the selected return to determine which line labels to use and where to enter amounts in the Return Data portion of your import file.

**Import Returns**

Importing your return is an alternative to manually selecting jurisdictions and entering data. Use the instructions below to create an import file. After the file has been created you can upload the file to check for errors and then import the return data.

**Louisiana**

**View Return Templates**

Select Return: Acadia Parish ▼

Select Filing Period: February 2013 ▼

**VIEW IMPORT INSTRUCTIONS** **VIEW AS PDF**

## Additional Guidelines:

- A return separator must be placed at the end of each return. The return separator consists of ten forward slashes (//////////). If preparing the import file in Microsoft Excel, the return separator should be entered on the last row of the file, in the first column. See the Example Import File below.
- Do not include commas when entering dollar amounts. For example, one thousand dollars in gross sales should be entered as '1000', not as '1,000'.
- When entering cent amounts, use a decimal place followed by two numeric digits. For example, one thousand dollars and twenty-five cents should be entered as '1000.25'. Whole dollar amounts do not need to be followed by '.00'.
- If you do not have data for certain fields or lines in the templates, you do not need to list them in the Return Data file.
- If preparing the import file in Microsoft Excel, save as type CSV (MS-DOS) (\*.csv)

### Example Import File:

```
ACADIA,02/2013,88889
Line1,2033.43
Line8,33.43
Line8_Explanation,Shipping Costs
LineA_13,1000
LineB_13,1000
//////////
```

Additional examples can be found at the end of this document.

# Importing Returns on SalesTaxOnline.com

1. Place your cursor over **Create Return** on the menu bar and select **Import a Return** from the dropdown menu.
2. To find the import file, click the **Browse** button.

**Import Returns**

Importing your return is an alternative to manually selecting jurisdictions and entering data. Use the instructions below to create an import file. After the file has been created you can upload the file to check for errors and then import the return data.

**Louisiana**

**View Return Templates**

Select Return: Acadia Parish

Select Filing Period: February 2013

VIEW IMPORT INSTRUCTIONS VIEW AS PDF

Open Import File  Browse...

CANCEL UPLOAD FILE

3. Select the file from your computer and click the **Open** button.
4. The file name appears in the field. Click the **Upload File** button.
5. A summary of import file information appears. The column labeled **Import Status** shows any errors detected in the file. If there are no errors detected, move to the section below labeled **No Errors**.

## Errors:

If there are any errors in the file, the import status displays **[Show Errors]**.

**Import Returns**

Importing your return is an alternative to manually selecting jurisdictions and entering data. Use the instructions below to create an import file. After the file has been created you can upload the file to check for errors and then import the return data.
